

HOW TO CASHLESS

Link Your Ticket to Your Cashless Account

Cashless payments work with a **Cashless Chip** directly attached to your wristband. To ensure this chip is loaded **BEFORE** the event, you can link your Ticketcorner ticket to your Cashless Account online in advance via our event portal. When you exchange your ticket for a wristband at the entrance, it will already be pre-loaded with funds, saving you time from topping up on-site.

Top Up Your Chip On-Site

If you don't top up in advance, you can, of course, load money onto your Cashless Account directly on-site. Charging stations are available at the entrance and in the bar/food truck areas. At the charging station by the entrance, you can load credit onto your chip using **cash, credit card, or TWINT**. At the charging stations in the bar/food truck areas, topping up is possible with **credit card/TWINT**. You can also check your current balance at any charging station.

Pay with Your Chip

Everything you consume on the WM grounds (drinks and food) can only be paid for with the chip on your wristband.

Payment Process: Order → Hold chip to the reader → Amount is debited from your account → Done

Check Your Balance

If you want to know how much money is still on your chip, you can check your remaining balance at any charging station on-site.

Refund Remaining Balance

You can request a refund for any remaining balance via the event portal starting **August 11, 2025**.
